

Product Information Certificate

AR1053**Acetanilide OAS Reference Material****LOT # 823J**

		Uncertainty by purity
% Carbon	=	71.09 ± 0.07
% Hydrogen	=	6.71 ± 0.01
% Nitrogen	=	10.36 ± 0.01
% Oxygen	=	11.84 ± 0.01
M.W.	= 135.16	

Test	Limits	Lot Results
Assay GC	≥98.5 %	99.9 %

This Organic Analytical Standard (OAS) contains 10g of high purity Acetanilide (C₈H₉N·O) powder for use as a routine working micro analytical standard for the determination of Carbon, Hydrogen, Nitrogen, and Oxygen. Refer to your instrument manufacturer's recommendations and/or test method for expanded uncertainty capabilities and minimum sample size.

Store tightly sealed under normal laboratory conditions. While unable to determine a definite shelf life this reference should be reviewed 10 years from the date of certification. Once opened this product has a 2-year shelf life.

This is a reference material (RM) and is verified by its purity and empirical stoichiometry in accordance with recommendations of the Analytical Chemistry Section of the International Union of Pure and Applied Chemistry. The values for Carbon, Hydrogen, Nitrogen, and Oxygen represent the stoichiometric values of high purity Acetanilide. The material used in production of this standard was identified in accordance with ARI-LAB-603. The bottling of this reference material was performed in accordance with ARI-LAB-611.

For good laboratory practice it is recommended that all standards be verified as fit for purpose prior to use. Remedies for any claimed defect in this product will be limited to product replacement or refund of the purchase price. In no event shall Alpha Resources be liable for incidental or consequential damages.

THIS RM IS VALID FOR TWO YEARS FROM THE DATE OF OPENING.
